76%
2018 - 2019
- SSC - 10th**
Sarva Vidhyalay High School, Kadi
80%
2016 - 2017

Live Projects

- XOsportshub**
FabAF
Built a fully responsive and interactive static website for XOSportsHub using React.js, custom CSS, and minimal Tailwind CSS. Implemented lazy loading, Framer Motion animations, and developed an admin panel for managing blogs and user activity, ensuring seamless performance and a high-quality user experience.
- IIM LMS**
FabAAF
Built a fully responsive and functional Learning Management System (LMS) using React.js and custom CSS with CSS variables for consistent theming and styling. Implemented Redux for efficient state management and lazy loading to enhance performance, delivering a smooth, reliable, and user-friendly learning experience.
- PartyPipeline**
FabAF
Handled complete frontend development and directly communicated with the client to gather requirements, finalize designs, and ensure smooth delivery aligned with their vision — including tasks like implementing animations, optimizing performance with lazy loading, managing state with Redux, and ensuring full responsiveness with clean, maintainable code.
- 1StopsboatSupply (Wordpress), Sendme, Mitti Chulha**
FabAf
Built fully responsive static pages using custom CSS, ensuring clean design, consistent layouts, and cross-device compatibility.

Professional Experience

FABAF Pvt. Ltd., Ahmedabad,

Position : Frontend Developer. 01 Feb 2025 – Present

Responsible for creating and maintaining responsive and user-friendly UI for websites. Also perform manual testing to ensure functional accuracy, UI consistency, and smooth user experience across different devices and browsers.
